Art Unit: 2875

DETAILED ACTION

Response to Amendment

1. Applicant's amendment filed on September 26, 2006 has been entered. No claim has been amended. Claims 130-133, 135-151, 153-164, 166-184, 251 and 252 have been cancelled. Claims 253-291 have been added. Claims 253-291 are still pending in this application, with Claim 253 being independent.

Allowable Subject Matter

- 2. Claims 253-291 are allowed.
- 3. The following is an examiner's statement of reasons for allowance:

Applicant teaches unitary light modules for illuminating an interior portion of a vehicle, such unitary light module consisting of a housing having an inner surface forming a reflector and a plurality of heat dissipating fins formed on the outer surface, a single high-intensity power LED located inside the housing, a lens, and a voltage conversion element. The reflector at least one of directs or reshapes light from the LED toward a light output area of the housing covered by the lens, such lens further at least one of directing or reshaping light from the LED towards a target area. The voltage conversion element being located opposite the lens, and including a DC step-down converter adapted for reducing the battery/ignition voltage of the vehicle to less than 5 volts and increasing the current to at least 100 milliamps, and powering the LED to deliver a luminous efficiency of at least 1 lumen/watt.

Application/Control Number: 10/054,633

Art Unit: 2875

Bos et al. (U.S. Pat. 5,671,996) disclose vehicle rearview mirrors including illumination means having an LED positioned inside a housing having a reflective inner surface, a lens closing an output end of the housing, and circuit means for powering the LED. However, the cited reference fail to individually disclose, or even suggest, the housing having heat dissipating fins, the LED being a single high-intensity power LED, circuit means as claimed, or the illumination means being formed as a unitary light module including only the claimed elements.

No prior art was found teaching individually, or suggesting in combination, all of the features of the applicants' invention, specifically unitary light module consisting of the claimed housing, LED and circuit means.

4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ismael Negron whose telephone number is (571) 272-2376. The examiner can normally be reached on Monday-Friday from 9:00 A.M. to 6:00 P.M.

Application/Control Number: 10/054,633

Art Unit: 2875

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Sandra L. O'Shea, can be reached on (571) 272-2378. The facsimile machine number for the Art Group is (571) 273-8300.

6. Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications maybe obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, go to http://pair-direct.uspto.gov. Should you have questions on access to Private PAIR system, contact the Electronic Business Center (EBC) toll-free at 866-217-9197.
